

Emergency Call Unit

The all-in-one emergency unit to provide assistance support by ADT Security

From as little as \$1 a day

ADT Security knows New Zealanders want to ensure their family and loved ones are safe and secure. Our Emergency Call Unit (ECU) is a cost effective option – offering both medical and personal safety assistance 24/7. The ECU provides peace of mind knowing that loved ones are protected and can call for assistance at any time.*

The personal, waterproof pendant can be worn on the wrist, around the neck or on a belt. This means that if your loved ones experience an emergency, they will have instant assistance at the push of a button.

24-hour Monitoring means peace of mind

Should an emergency occur, a push of your personal waterproof pendant will alert our ADT monitoring centre. An ADT monitoring specialist will communicate through the ECU device to determine what type of assistance is needed. If we are unable to make contact through the two-way speaker on the device, we will follow the emergency procedures and alert your designated emergency contacts.

If accidentally activated, the request can easily be cancelled by pressing the Cancel button on the ECU.

Ask us about your all-inclusive patrol services* and ADT Select - our free web-based portal that allows you to quickly review your monitoring account online.
