

ADT Home Security System

**Peace of mind for
your home and family**

**Peace of mind
from anywhere**

Security offering & Monitoring

An ADT home security system can offer you and your family peace of mind.

With 24/7 back to base security monitoring your home has an extra level of protection even when you are not there. As a specialist in home security, ADT understands that all homes are unIQ2ue and as such offer a suite of different products to help not only protect your home but offer modern convenience. Take advantage of our 24/7 Live streaming cameras, check in on your home from your phone or smart device while at work or on holidays. We also offer home automation with our Automated Security package, allowing you to control appliances from your phone or smart device.

Interactive Smarts

With an ADT Interactive Security system you can monitor and control your home or business in real-time and from anywhere – from your Android or Apple device. ADT Interactive Security, video monitoring, energy management and home automation solutions give you instant awareness and remote control for the places you care about most.

Remote Features:

-  Arm and disarm your security panel
-  Turn lights on or off
-  Lock or unlock door with Zwave door lock support
-  Video analytics
-  4G, Bluetooth & Wifi support

Wireless Home Security Systems

ADT Security has a range of wireless security solutions which means an ADT security system can be installed with no cables and wiring throughout your home. Our alarm components work using RF technology to communicate signals to and from the system. The added advantage of wireless technology means servicing your wireless security alarm system can be done easily without the need to check metres of physical wiring. If you need to move home a wireless system is portable and can be quickly uninstalled and moved to your new home.
