

Vonex Phone App User Guide

Connect in the cloud

The Vonex Phone application allows your desk phone number and PBX extension to be setup directly on a computer or any android or iOS device.

Calls to and from your desk phone number can be made from your desktop or mobile app including dialling the extension number of another colleague. The app also offers instant messages between all users.

To make a call on the app simply dial the numbers on the dial pad and then press the Navy Handset Icon.

Making a call

Answering a call

To answer a call, click on the Blue Icon.

Once answered, you will have different options for the caller, depending on your device;

- Mute the call
- Open the keypad
- Turn on Speakerphone
- Hold the call

DESKTOP VIEW

- Add in another caller
- See more options

• Transfer the call • Hang up the call

Holding a call

To hold a call on the app simply press the hold key on the options panel. This will place the caller on Hold and have them listen to on hold music.

More parties can be introduced into the call to create a conference call, by dialling them in with the keypad, selecting them from your contacts or pressing the add call button.

Multiple calls

To hold multiple calls on the app, continue to press the hold key on the options panel after you have dialled the new number. This will place multiple callers on Hold and have them listen to on hold music.

Press the blue icon to switch between calls, or press merge in the options panel to start a conference call.

Call First (Announced)

Call recording

To record your call press the more options button and select Start Audio recording. You will see a red flashing dot in the top right hand corner. When you are finished press Stop Audio Recording in the more options panel.

You can listen to your recordings in your History tab in the bottom menu bar. Tap the information icon on the right, then select listen to recording.

Contact list

Call has a built in Contact List that can be accessed by clicking on the Contacts icon. The contacts can be accessed and dialled directly through this list. It also shows you their availability if they are part of your PBX. The status will turn green if they are free New Contacts can be added or imported from another device.
